Forecast for Monday 03 Apr 2023

Weather: After a cold and frosty start with perhaps some isolated patchy valley mist at first, it will be a dry and mostly sunny day. Breezy and feeling quite cold on the summits but relatively pleasant in the sunshine. Staying dry through the evening but turning cold.

Chance of cloud-free hill tops above 600m: 60% becoming 90% from mid-morning.

Low cloud and visibility: Banks of clouds are possible between 400-600m at first, quickly lifting. Thereafter, only patchy cloud above summits. Generally very good visibility but locally poor or very poor in any scraps of lower cloud and morning mist.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

UV levels will be moderate in the prolonged sunshine, especially during the afternoon so some additional sun protection may be required. Despite the sunshine, it will feel cold in the breeze particularly on the summit.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Sat 01 Apr 2023	12.6mm	25.4mm	51.8mm

Forecast for Tuesday 04 Apr 2023

Weather: A cold start with some early mist and shallow fog patches in the valleys quickly clearing, leaving a fine and dry day. Higher level cloud will move in during the afternoon turning the sunshine hazy, though staying dry into the evening and overnight.

Maximum wind: Southerly 8-10 mph gusting 15 mph at times in the afternoon.

Chance of cloud-free hill tops above 600m: 90%

Low cloud and visibility: Generally good visibility but locally poor in any morning mist and fog patches. A slight haze at lower elevations may cause distant landmarks to appear faint.

Temperature: **Valleys:** Minus 4 Celsius, increasing to plus 11 Celsius.
At 600m: Minus 2 Celsius, increasing to plus 5 Celsius by late afternoon.
Freezing level: Generally above the summits, however sub-zero 300-600m and also below freezing in the valleys until mid-morning.
